YOGINARA PRATAMA SITORUS, S.Tr.Kom

FULL-STACK WEB DEVELOPER & SOFTWARE ENGINEER

Bandung, Indonesia • +62 813-6064-0668 • yoginara2004@gmail.com • github.com/Yoginara • linkedin.com/in/yoginara

PROFILE SUMMARY

Applied Bachelor of Informatics Engineering graduate (GPA: 3.56 / 4.00) from Universitas Logistik & Bisnis Internasional (ULBI), specializing in full-stack web development and scalable backend architecture. Proven production track record at regional utility BUMD maintaining a 116,000+ LoC codebase, engineering dynamic ISO 31000:2018 residual risk algorithms, and boosting reporting efficiency by 85%. Proficient in Laravel 12, CodeIgniter 3, Go (GoFiber), relational (MySQL, Oracle OCI8) and NoSQL (MongoDB) database optimization, test-driven development (PHPUnit 11), and OWASP Top 10 security. Officially certified by BNSP as a First-Level Computer Network Technician (valid 2026–2029).

SOFTWARE ENGINEERING WORK EXPERIENCE

Full-Stack Web Developer & Software Engineer Intern Sep 2025 – Dec 2025

Perumda Air Minum Tirta Raharja (Regional Water Utility BUMD) Bandung / Cimahi, ID

- **Enterprise Architecture Maintenance:** Engineered and maintained an Enterprise Governance, Risk, and Compliance (e-GRC) web suite built on CodeIgniter 3 MVC across a **116,000+ LoC** codebase (203 controllers, 188 relational models).
- **Dynamic Residual Risk Engine:** Implemented a reactive client-side calculation model in *risk_analisisdetail.php* compliant with ISO 31000:2018: *Risk Reduction = Effectiveness × (% Progress / 100)*, eliminating subjective bias.
- **85% Reporting Workflow Acceleration:** Refactored the corporate Risk Working Paper reporting engine, slashing compilation cycles from **~10 business days to automated instant generation**.
- **Dual-Database Abstraction:** Managed database persistence across MySQL/MariaDB and Oracle Enterprise (OCI8) through custom ADODB drivers with centralized soft-delete query filtration.
- **Engineering Standards & AI Documentation:** Authored the developer architectural guide *.github/copilot-instructions.md* to standardize code conventions and AI coding assistant workflows.

KEY SOFTWARE ENGINEERING PROJECTS

CMI Content Management System & Database Query Optimization Nov 2026

Laravel 12.0 • PHP 8.2+ • Tailwind CSS v3 • SQLite/MySQL • PHPUnit 11 Enterprise Architecture

- Architected an article publishing platform featuring granular ownership authorization (Laravel Policy anti-IDOR), collision-free sequential slug generation, and Flysystem media lifecycle management.
- Optimized relational query throughput using Query Builder **INNER JOIN**, column aliasing, and 10-record pagination maintaining low memory footprint **< 8 MB**.
- Achieved **100% Green test suite (39 automated unit & feature tests, 134 assertions)** using PHPUnit 11 alongside OWASP Top 10 mitigation.

StepUp & ManukShop Platform — High-Throughput REST API Microservices 2026

Go (Golang 1.22) • GoFiber v2 (FastHTTP) • MongoDB Atlas • JWT • Swagger Backend Microservice

- Constructed high-concurrency RESTful microservices with sub-millisecond response latency powered by GoFiber fasthttp core for high-throughput product catalog and transactions.
- Implemented JWT authentication, Bcrypt password hashing, MongoDB embedded snapshots, and OpenAPI/Swagger documentation.

ADDITIONAL ENGINEERING & RESEARCH PROJECTS

RTConnect — Digital Community Administration & Public Validator 2026

PHP Fullstack • MySQL (15+ Relational Tables) • Bootstrap 5 • QR Validator E-Government

- Developed a web-based smart community management system streamlining dues collection, real-time ledger auditing, and automated official resident certificates with public QR verification.

CIT-TPRO: Convolution Interactive Transformer Deep Learning 2026

Python • PyTorch • Linear Self-Attention O(N) • EEG Biomedical Signal Fusion AI Research

- Investigated hybrid Transformer architectures with linear attention O(N) and PSD+DE feature fusion for emotion recognition on benchmark EEG datasets (DEAP, DREAMER).

EDUCATION

Universitas Logistik dan Bisnis Internasional (ULBI) Graduated 2026

Bachelor of Applied Science in Informatics Engineering (S.Tr.Kom) | ***GPA: 3.56 / 4.00*** Bandung, Indonesia

Focus: Software Engineering, Enterprise Database Systems, Computer Network Infrastructure Graduated with Distinction

LICENSES & CERTIFICATIONS

First-Level Computer Network Technician (Teknisi Muda Jaringan Komputer) • Badan Nasional Sertifikasi Profesi (BNSP RI) 2026 – 2029

Reg No: JIK.215.00004.2026 • LSP ULBI (7 SKKNI Units: Topology, IP Addressing, Switching, Cabling)

Java Programming Certificate • Oracle Academy Jun 2023

Object-Oriented Programming, Data Structures, Polymorphism & Algorithmic Analysis

Java Fundamentals Certificate • Oracle Academy Jan 2023

Core Java Syntax, Procedural Flow & Computational Logic

MATLAB Onramp Course Completion (Score: 100%) • MathWorks Mar 2023

Numerical Matrix Computations, Graphical Visualization & Data Processing

Introduction to JavaScript • Great Learning Academy Mar 2024

DOM Scripting, Modern JavaScript ES6+ & Asynchronous Handling

TECHNICAL SKILLS MATRIX

Programming Languages:	PHP (8.x), Go (Golang 1.22), JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frameworks & Libraries:	Laravel 12.x, CodeIgniter 3 MVC, GoFiber v2, Tailwind CSS v3, Bootstrap 5, jQuery, Blade
Databases & Storage:	MySQL, MariaDB, Oracle Database (OCI8), MongoDB Atlas (NoSQL), SQLite, ADODB Driver
QA & Security Standards:	PHPUnit 11 (TDD/Automated Testing), OWASP Top 10 Mitigation, CSRF, XSS Escaping, IDOR
Networking & Infrastructure:	BNSP Certified Network Technician, TCP/IP, IP Addressing, Switching, Structured Cabling
Tools & Methodologies:	Git, GitHub, RESTful API, Postman, Swagger/OpenAPI, Composer, NPM, Linux Environment
